### 2, Installation tool (for reference only)

1.manual electric drill	2.pencil	3.tape ruler	4.hammer	5.bit
	The second second second			
6.hacksaw	i.angle ruler	8.screwdriver	9.Cutter	10.chisel

3. Opening size diagram (for reference only)

## 4、Installation

## 5. Handle direction change and square axis position adjustment

According to the actual needs of their own, with a screwdriver inserted into the iron plate arrow pointed to the round hole twist loose screws, according to the actual left or right open need to turn the handle 180°, and then tighten the screws. Warm Tips: Please do not disassemble the screws in the handle hole, disassembly caused by failure do not do warranty!

# 6、Installation steps

#### I. Open mortise hole

1. Draw a horizontal center line on the inside/outside side of the door 1 meter from the ground.

2. Fold the opening template in half to make room for the holes, align the center line of the handle of the template with the horizontal line on the door, and draw the opening lines on the front and side of the door according to the requirements of the opening template.

#### II、Install the lock mortise

1. Insert the lock mortise into the opened door hole. Secure the lock mortise to the door with two self-tapping screws.

#### III. Front panel installation

Route the cables delivered with the front panel Align the square shaft with the square shaft hole of the lock core and stick close to the door body after insertion.

#### IV. Install front Panel

 Connect the power cables to the front and rear panels and plug them into the mortise hole.
 Keep the rear bottom plate close to the door body, and lock the rear bottom plate and front panel with three M5 screws at the same time.

#### V. Rear panel installation

Fit the rear panel to the rear bottom plate. At the same time, use two screws to fix and lock the rear bottom plate and the rear panel.

#### VI. Battery Installation

Install the 4 AA batteries into the battery box and install battery cover.

#### VII. Debugging

1. View the door lock operation guide after setting the door lock, test the door lock unlocking function.

2. Turn the handle to check the flexibility of the front and rear handles.

3. Insert the mechanical key and turn it clockwise to check whether it is normal to unlock the door.

#### VIII. Replace Battery and Emergency unlock

1. When the lock prompts that the battery power is low, the battery cover can be removed by pressing the button and replace battery.

2. Plug into the external power supply through the Type-C interface for unlocking.

# III、Function and Operation

# 3.1 Function menu operation extension map

# 3.2 Lock function management
